Education

Georgia Institute of Technology - GPA 4.0/4.0 **Aug 2024 - Dec 2027**

B.S. Mechanical Engineering (Pi Tau Sigma, Honors Program)

Experience

John Hopkins Applied Physics Laboratory **June 2026 - Present**

Mechanical Engineering Intern (Temp-on-call currently)

- Developed a Vision-Language-Action (VLA) ML pipeline for YAM Pro robotic arms using the open-source LeRobot framework; trained ACT and π0 policies achieving >80% task completion + scene generalization capabilities
- Implementing a vision-based detection and landing protocol using OpenCV, MAVLink, MSP, and ROS 2 for FPV drones
- Engineered an autonomous UAV landing platform for UAV–UGV integration with six-drone fleet

Georgia Tech School of Mathematics **Aug 2025 - Present**

Undergraduate Teaching Assistant

- Leading weekly recitations for a 1,600+ student linear algebra course, hosting office hours, assisting with grading

The MITRE Corporation **May 2025 - Feb 2026**

Systems Engineering Intern

- Prompt-engineered Llama Maverick-4 LLM to classify and summarize NOTAM data within MITRE air traffic datasets
- Developed visualization interfaces using Python (Dash, Plotly, Pandas) to support traffic flow decision-making, increasing runway config. selection efficiency by 50% through validated data processing and display

Consult Your Community **Sep 2024 - Present**

Senior Business Analyst

- Building financial visualizations using Excel + SQL, conducted competitor analysis for three Atlanta-based clients
- Led expansion planning and delivered actionable presentations with strategic and technical recommendations

National Aeronautics and Space Administration **Aug 2023 - Dec 2023**

Intern

- Annotated audio using Prodigy workflow to train models on speaker diarization + classification in air traffic control audio

Research + Projects

Exoskeleton and Prosthetics Intelligent Controls Lab **Jan 2025 - Present**

- Designing hip–knee and ankle exoskeleton struts in with textile integration to withstand >20 Nm torque, reducing weight and profile while improving torque transmission and comfort
- Prototyping components using FDM, SLS, carbon fiber, and laser cutting; supported biomarker placement for VICON and OpenSim data collection trials

Medical Robotics Club **Sep 2024 - Present**

- Designing residual limb attachment cuff, weight support mechanism, and haptic feedback motor housing for a lightweight, affordable prosthetic arm and hand in Fusion 360
- Integrating servo motors, linkages, and sensors using Arduino components for ergonomic fit and manufacturability.

International Research Collaboration with Daegu Science HS (Korea) **Aug 2022 - June 2024**

- Synthesized biomimetic alginate hydrogels and used tensile stress-strain testing to produce Young's Modulus <1 kPA

Leadership

VP of Industry Relations, GT Society of Women Engineers (SWE) **May 2025 - Present**

- Connecting with 30+ companies per semester, organizing networking and industry events for 400+ member organization

Founder and President, Girls in STEM **Jan 2022 - June 2024**

- Conceptualized and supervised elementary STEM sessions and workshops, impacting over 400 young girls

Head Drum Major, Marching Band **Aug 2020 - June 2024**

- Led 215 member ensemble, placed at national competitions (French horn, mellophone, piano)

Skills

MATLAB, Python (OpenCV, pymavlink, Dash), CAD (Solidworks, Fusion360), ROS2, Machine Learning (LLM, VLA), Linux

Awards

SWE Liebnherr Scholar, National Merit Scholar, AFCEA DC STEM Scholarship, Lightridge High School Salutatorian (2024), NOVEC Manley Garber Scholarship, Semper Fidelis Marine Corp Award Musical Excellence
